Re: Amended Notice of Intention, Cameron #1 Mine, S/047/036, Uintah County, Utah

Dear Mr. Minden:

On October 21, 1994, the Division received your map showing changes in the areas you now propose to operate in at the Cameron #1 mine site. This map will be considered by the Division as an amendment to the existing small mining notice of intention. The Division approves of the amended disturbed area boundaries as indicated in this map.

The map proposes two areas of disturbance described as the "Tar Sand Mine and Stockpile Area" (2.7 acres) and the "Aggregate/Tar Sand Stockpile Area" (2 acres). During our last discussion here at the Division, you indicated the road access connecting the two areas would be modified due to construction of the water bypass and reclamation of the other roads. This map does not indicate any such modifications to the roads between the two areas. We are aware of the reclamation recently performed at the site and plans for additional reclamation work to be completed before the end of this year, if weather permits. For that reason, it may be best to include a similar mine site map with the annual report for 1993 identifying: those areas which have been reclaimed, those roads which were modified, and those roads which will continue to be used as a part of your operations.

Thank you for your continued cooperation and best of luck with your mining venture.

Sincerely,

Anthony A. Gallegos
Reclamation Engineer
